In this *Ex Tropicis* package, the following photos are available for immediate release:

**Photo 1:**

Tucuruí (color and B&W) - A Landsat satellite image depicting sediment-filled water entering the Tucuruí hydroelectric dam. Credit: INPE-SCT/NMA-Embrapa.

**Photo 2:**

Tucuruí (B&W) - General view of the Tucuruí dam in the Tocantins River, in the state of Pará. Archive photo/11.26.84. Horizontal. Credit: Sidney Corrallo/AE

**Photo 3:**

Tucuruí (B&W) - "paliteiros" (dead trees) - toothpicks - on the shores of the Tucuruí dam. Archive photo/11.26.84. Horizontal. Credit: Sidney Corrallo/AE.

**Photo 4:**

Demene (color and B&W) - Aruaque girl of the Pai Raimundo community, on the shores of the Demene River, in the state of Amazonas (AM). Horizontal. Credit: Luiz Prado/AE.

**Photo 5:**

Demene (color and B&W) - Evaristo Eduardo de Miranda - head of the Environmental Monitoring Nucleus (EMN-Embrapa), on board the expedition boat with other researchers. The group is observing the vegetation of the Tuiuiu igarapé (narrow brook between two islands), off the Demene River, AM. Horizontal. Credit: Luiz Prado/AE

**Photo 6:**

Demene (color and B&W) - Antonia da Silva, of the Aruaque tribe, making manioc flour at the Pai Raimundo community, on the margins of the Demene River (AM). Horizontal. Credit: Luiz Prado/AE.

**Photo 7:**

Demene (color and B&W) - Researchers prepare to visit the Cuieras igarapé. In the background is the Demene River, AM. Vertical. Credit: Luiz Prado/AE

**Photo 8:**

Demene (color and B&W) - Ianomami woman with a child, in a hammock at the Ajuricaba "maloca" village, on the Demene River, AM. Credit: Luiz Prado/AE.

**Photo 9:**

Demene (color and B&W) - March 1988 Landsat 5 satellite photo. On the lower part of the picture is the Negro River, with its meanders and islands, in black and white. In another cloud-filled spot, under this image, the Negro meets the Demene River, which runs on a perpendicular line from the upper part of the photo. Curving left, between the Demene and the Negro, is the Aracá River, part of the Demene expedition route. Three large spots appear on the left and right margins of the Demene. The spot on the right margin is the lavrado fields - natural pasture-like land typical of the Amazon region. The varzea inundated fields (low and flat land alongside a watercourse) lie on the left margin, and the sand dunes (lighter spot), on the far-left. Vertical. Credit: INPE-SCT and NMA-Embrapa

**Photo 10:**

Bonito (color and B&W) - Tourists bathe at the Aquidaban waterfall, in the Bonito region. Vertical. Credit: Itamar Miranda/AE

**Photo 11:**

Bonito (color and B&W) - Rock formations at the Lagoa Azul (blue lake) grotto. Horizontal. Credit: Itamar Miranda/AE.

**Photo 12:**

Bonito (color and B&W) - Tourists on a rubber raft over rapids on the Formoso River. Horizontal. Credit: Itamar Miranda/AE.

**Photo 13:**

Bonito (color and B&W) - General view of the Formoso River. Horizontal. Credit: Itamar Miranda/AE.

**Photo 14:**

Sugarcane (color) - Sugarcane worker sets plantation on fire to ease harvest processes. Horizontal. Credit: Fernando Calzani/AE.
